

VACCINATION ROLL OUT

Over 10m people in the UK have received their first dose of a Covid-19 vaccination

As of Feb 2nd, over 10m people in the UK had received the first dose of a Covid-19 vaccination and almost 500,000 have received their second dose. There is some evidence that people who have received the vaccine are much less likely to spread the virus. This has yet to be confirmed and it is important to continue to follow lockdown advice in the meantime to prevent further transmission.

The NHS requests that you do not ring your GP's surgery or hospital unless you have received an invitation.
